PROFESSIONAL SUMMARY

Motivated undergraduate student specializing in Software Systems Technology with strong interest in Software Engineering, Quality Assurance, and Business Analysis. Gained hands-on project exposure through university-based web, mobile, and IoT systems. Familiar with Software Development Life Cycle (SDLC), Agile methodologies, requirement analysis, object-oriented programming, and basic software testing concepts. Passionate about building reliable and efficient software solutions and continuously improving technical and problem-solving skills. Seeking a Software Engineering internship to gain real-world industry exposure and contribute to development teams.

EDUCATION

Undergraduate: Bachelor of Information and Communication Technology (BICT)

2023 – Present

Specialization : Software Systems Technology

University of Kelaniya, faculty of computing and technology

GCE Advanced Level (Engineering Technology Stream)

2021

Results: A B B

Rank: 23th in Hambantota District

TECHNICAL SKILLS

Programming Languages

Java · Python · JavaScript · PHP · SQL · Arduino C

Web & Mobile Development

HTML · CSS · JavaScript · Firebase · FlutterFlow · Android Development Basics

Tools & Technologies

GitHub · Jira · Postman · MySQL · draw.io · Figma (Basic) · vs code, intellij ide, antigravity, playwright

Software Engineering & QA Concepts

SDLC · Agile Scrum · Object-Oriented Programming (OOP) · Manual Testing · Functional Testing · Bug Reporting · Test Case Design · REST API Basics

Business Analysis & System Design

Requirement Gathering · UML Modeling · Documentation · User Flow Analysis · System Analysis · UI/UX Fundamentals

PROJECTS

MealSpace – Surplus Food Sharing Application

Developed a mobile application for sharing surplus food between providers and receivers with focus on system workflow and backend integration.

Technologies: FlutterFlow · Firebase ·

Smart Shooting Practice System

Designed the architecture and prototype of a web-based shooting practice management system integrated with Arduino sensors.

Technologies: HTML · CSS · JavaScript · Arduino C

Smart Oil Lamp Ignition System

Developed a smart oil lamp ignition system integrated with microcontroller and web application.

Technologies: HTML · CSS · JavaScript · Arduino C · Python

Tool Rental System

Developed a web-based tool rental management system with database and rental workflow handling.
Technologies: PHP · MySQL · HTML · CSS · JavaScript

LANGUAGES

English – Professional Working Proficiency | Sinhala – Native

INTERESTS

Software Engineering · Web Development · Android Development · Software Quality Assurance · Business Analysis · Artificial Intelligence · Computer Vision · Machine Learning · UI/UX Design · Prompt Engineering
